

Tube set with fine adjustment

002.1680 Tube set 2 meter with fine adjustment, excl. projector specific bracket

Besides the standard ceiling mounts we have now made available tube sets with integrated fine adjustment, especially for the heavy installation projectors. These sets are available in 3 lengths, which can be shortened on location. By means of the fine adjustment (check art. nr.: 002.1650), with screw thread, it is possible to continuously pan and tilt the projector 10 degrees from the heart of the lens. Combine this set with a projector specific bracket (art. nr. : 002.1001)

Tube set with fine adjustment
