

## Stainless steel mirror kit

### **002.2000** Stainless steel mirror set (combine with wall mount 002.1560-62 + 002.1001)

Our mirror set allows you to position a projector above the suspended ceiling, with a mirror mounted directly below the ceiling; the ball joint will ensure projection at the proper angle. All visible parts below the ceiling are made of stainless steel. The mirror set should be combined with a wall mount (art. nr.: 002.156x), and a projector-specific bracket (art. nr.: 002.1001).
