

Wall lift for touch screens max. 120 kg

052.7500 Wall lift for touch screens max. 120 kg

This wall solution is a perfect addition to the current electric lift range. Thanks to its compact design, only 90mm between wall and display, and the 2 lifting columns extra stability and sturdiness is provided for working with your touch display. The height of the display is easily and quietly adjusted with the manual control. The standard integrated anti-collision feature provides instant protection against clamping.

Straightforward installation and an integrated bracket with VESA up to 600 x 400 make this wall lift an ideal solution from boardroom to classroom.

The wall lift can be further extended with for example a five surface whiteboard solution, a soundbar bracket or the floor support for weak wall mounting.

Wall lift for touch screens max. 120 kg

Features:
