

Inceiling

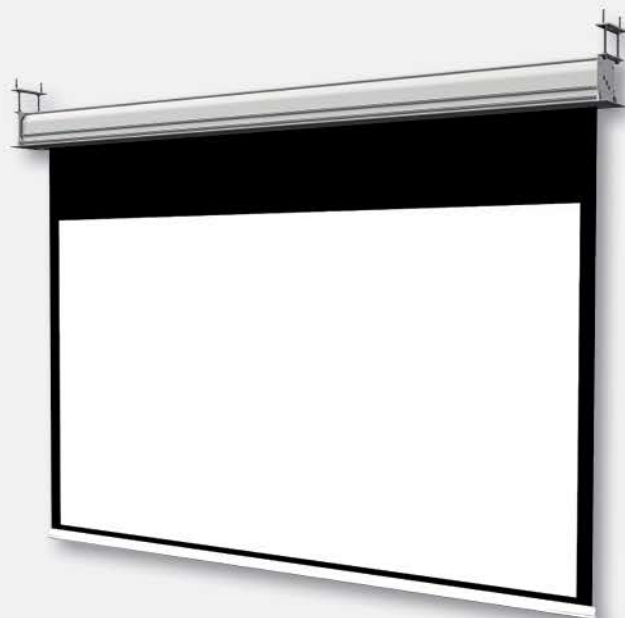

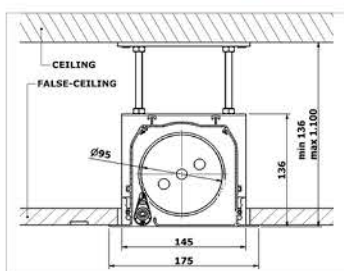

When you want me.

A discreet but effective presence, designed and produced for those who need a totally reliable screen only visible when in use.

It mounts high flatness fabrics and is extremely easy to install thanks to the exclusive easy-cut system which remarkably simplifies installation. A stencil shape gives the right measurements to properly cut the false ceiling. Attaching the stencil to the ceiling in the chosen position the panels will be easily cut, thus avoiding the common mistakes cutting measurements.

Among the accessories there are the spacing bars which allow positioning the screen at more than a metre from the ceiling.

Technical details

Screen characteristics

- totally hidden screen
- easy-cut mounting system
- reliable and silent motor
- remote control on request
- fixing brackets adjustable up to 110 cm height
- excellent flatness of fabrics
- white counterweight

Available fabrics

- White Ice
- Home Vision
- Nova-Vision
- Microperforated
- Grey High Contrast
